PROFESSIONAL EXPERIENCE

MyCoach Sport - Backend Developer - CDI

NOVEMBER 2022- MAY 2023

My coach is the branch of Mc gathering solution for this sports federation. I realized a lot of synchronization coming from different sources in **Scala**, **RabbitMQ** and **Mongo** DB.

I also accompanied the CTO in the architecture, and I realized the backend for the ping pong federation project from scratch. The stack was **nest.js** with **Mongo** DB.

MyCoach PRO - Backend Developer - CDI

SEPTEMBER 2021 - NOVEMBER 2022

During my time at MyCoach, I was a part of the backend team, Mycoach is leader of sport software. I realized different task on different product mycoach count 20 different products. I work on microservice environment on **TDD** to insure the best quality for the code base. I mainly worked on distributed architecture using **RabbitMQ** in **Scala** and **Go**. For the database, we use **MySQL** and **Mongo**.

WeProov - Full stack developer- Internship

FEBRUARY 2021 - JUN 2021

During my internship at WeProov, I developed and maintained a Web App (front end and backend). In purpose, to realize rapport's review for the car's damage. The goal for the company is to have an adjustable tool to create data set.

Flexper - Developer Blockchain / Backend - CDI

FEBRUARY 2020 - FEBRUARY 2021

During my time at Flexper, I worked on a blockchain solution combining IoT and smart water management. I was in charge of designing the whole data structure as well as developing the blockchain side of the project. I also deployed a private blockchain in production to match the solution's needs. I was also working on other projects, such as coding the backend of a social network dedicated to books.
